PARENT/GUARDIAN NOTIFICATION HEALTH SERVICES for 9th Grade Students and New Entrants

Board of Education policy requires grade 9 students and new entrants to MHRD have a comprehensive physical examination, which includes

Examination of their ears, nose, throat, heart, lungs, abdomen, and back. Additionally, an examination for hernia and scoliosis are included.

This examination should be completed at the student's doctor's office or medical clinic by the healthcare provider of your choice.

The results of the examination conducted must be documented on the district Medical Examination Form and will be kept on file in the Health Office.

Medical forms may be obtained on the district website or in the nurse's office. The examination is acceptable up to 365 days prior to entering the school district.

If your child has not had a physical within the last year, please make an appointment as soon as possible with your healthcare provider.

The Physical Examination forms submitted for students participating on a MHRD sports team, Marching Band, Cheerleading or Ski Club meet this requirement. Do not submit another physical examination form. (Please refer to the MHRD Student/Parent Handbook for more information about sports physicals.)

Please remember that regular physical examinations are important during adolescence to help ensure that your son/daughter maintains good health. Thank you for your prompt attention to this matter.

ACCEPTABLE USE OF COMPUTER NETWORKS/COMPUTERS AND RESOURCES

Use of the District's computer facilities is a privilege given to students to facilitate completion of class assignments and projects. The proper use of these facilities is detailed in the Board of Education's Acceptable Use Policy (AUP) which can be found on the district website (Board Policy and Regulation [2361](#) – Acceptable Use of Computer Network/Computers & Resources). Below are some clarifications and rules that, together with the AUP, set the expectations that students will adhere to regarding computers and related systems.

- Students may use facilities only for educational tasks assigned by an administrator, teacher, or librarian. You may only use those technology devices identified for use by students. Use of technology devices for any purpose other than the completion of an assignment or project under the supervision of an instructor is forbidden.
- Students may use only those programs, statements, and commands in which they have received permission from their instructor and which are necessary for the completion of the assignment. Any other use is forbidden on any district computer.
- Removable storage devices such as, DVDs, memory sticks, or other external storage devices shall remain under the control of the teacher. Students are responsible for the cost of any school storage device ruined through misuse.
- Students are responsible for the cost of removal of any virus or virus-like programs or files introduced into district computers or networks because of any unauthorized use such as downloading, emailing, or otherwise transacting data with our internal network or the internet.
- No technology equipment is to be moved by students unless under the direct supervision of the instructor. Vandalism of district technology equipment by students is strictly forbidden. Students are responsible for the cost of technology equipment damaged through misuse.
- Students will not connect their own or other equipment to district systems unless under the direction of the instructor. This includes establishing links with wireless devices.
- The district systems exist for the enhancement of curriculum and are not to be used to read, explore, or view inappropriate topics.
- Students are to utilize only those portions of the district computer network that are authorized by their instructor for educational purposes. Entry into or exploration of unauthorized areas of the network is strictly forbidden.
- Each student is expected to write, keyboard and run his/her own assignments. Any student judged to have copied or destroyed another student's electronic assignment will automatically receive a "zero" for the assignment. Other appropriate disciplinary actions may apply.
- The use of handheld devices such as cell phones and iPods may be used as tools for classroom instruction under direct supervision of the instructor.
- Social Networking sites including but not limited to Twitter and Facebook may be used as tools for classroom learning and sharing under the direct supervision of the instructor.

In general, any student operation or usage of technology devices not specifically instructed by and assigned by an instructor is forbidden. Failure to strictly observe any of these guidelines will result in immediate loss of the privilege of using District technology devices and systems and could result in further disciplinary actions. In addition to the above, other rules may be instituted by your instructor. All students are expected to follow the rules for their particular class.

I have read and understand the Acceptable Use Policy (AUP), and the above guidelines, and agree to comply fully.
