Did you know?

Dating violence is more common than people think, especially among teens and young adults: one in three teens in the US will experience physical, sexual, or emotional abuse from someone they're in a relationship with before they become adults, and nearly half (43%) of college women report experiencing violent or abusive dating behaviors.

Please join us to discuss the very important topic of TEEN DATING VIOLENCE. Our speaker is from the JBWS. The JBWS offers educational presentations and counseling services specifically on dating abuse. Youth are learning to understand the prevalence and warning signs of dating violence, discern healthy versus abusive behaviors, and know the resources for assisting a friend or themselves. The programs reach more than 8,000 teens per year in Morris County.

Join our program to get the real facts!

81% OF PARENTS BELIEVE DATING VIOLENCE IS NOT AN ISSUE OR SAY THEY DON'T KNOW IF IT'S AN ISSUE.
